

1/4

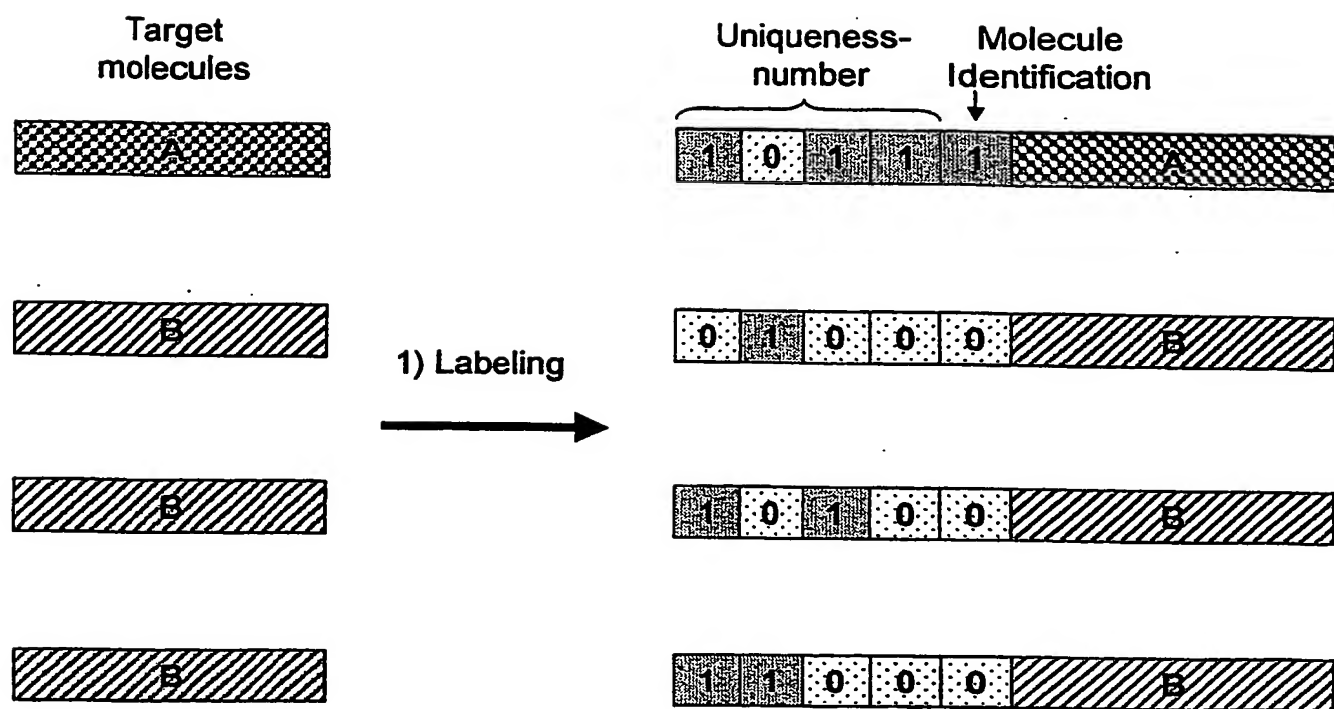

Fig. 1

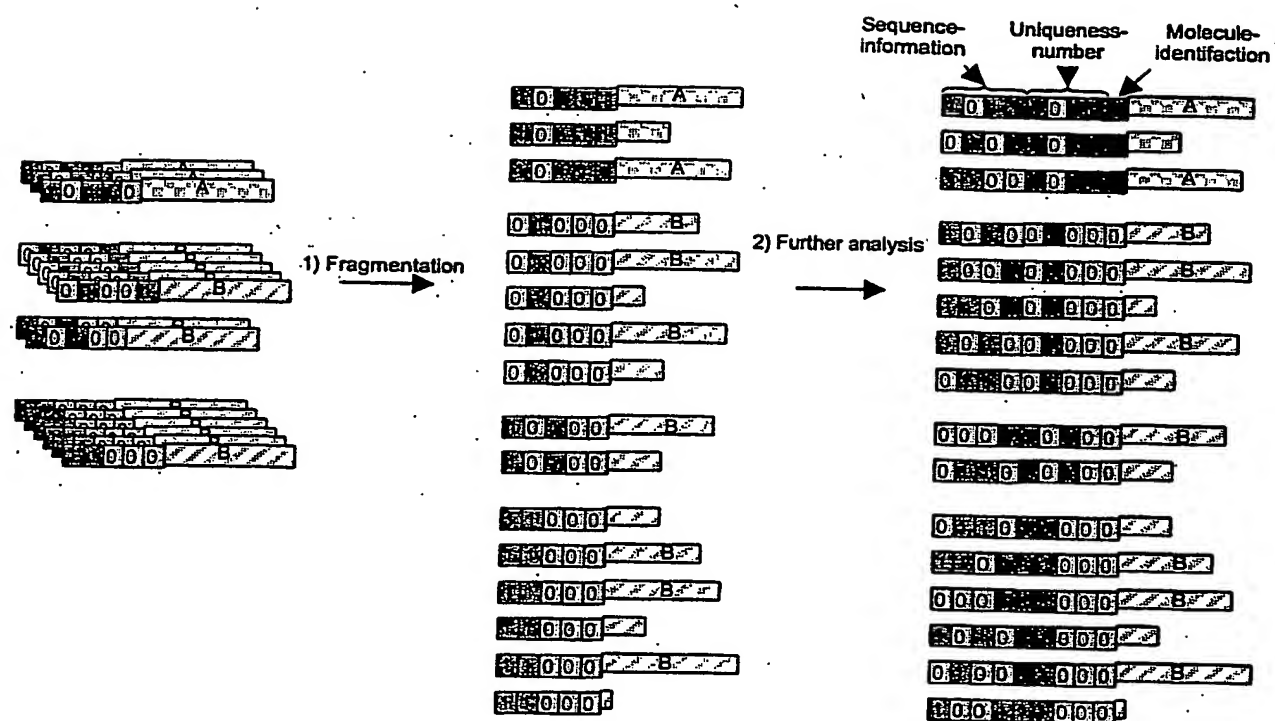

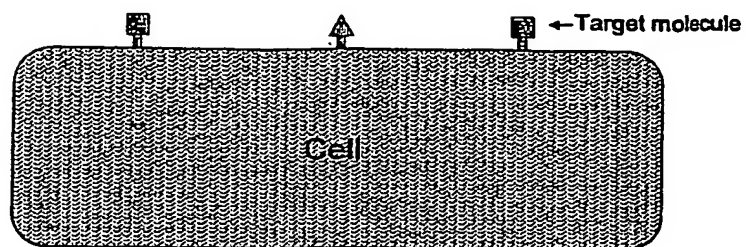

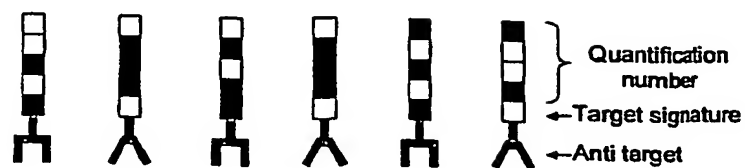

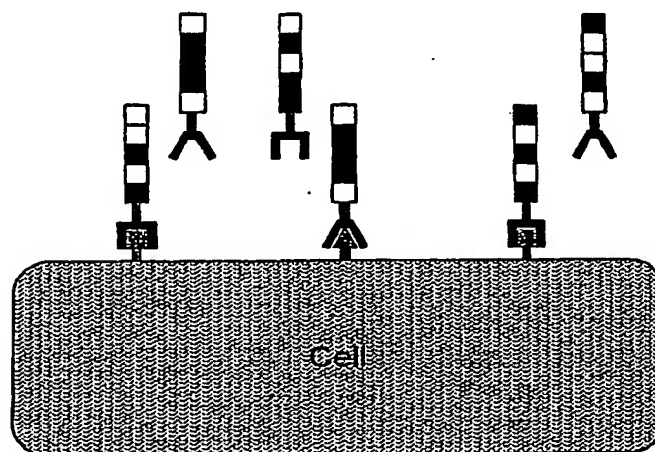

Figure 2

1) Mix Design Polymers and target molecules:

2) Design Polymers are attached to target molecules:

3) Remove unattached Design Polymers and amplify the remaining Design Polymers:

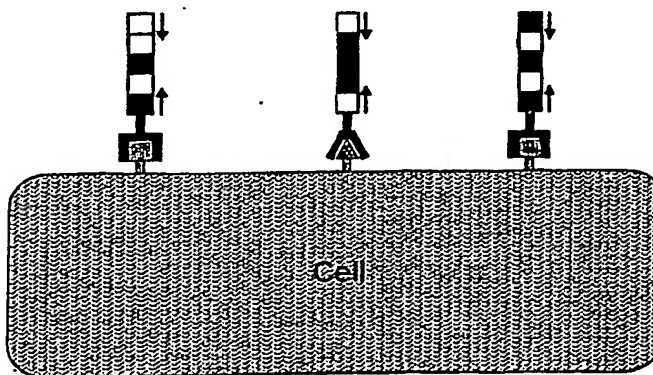

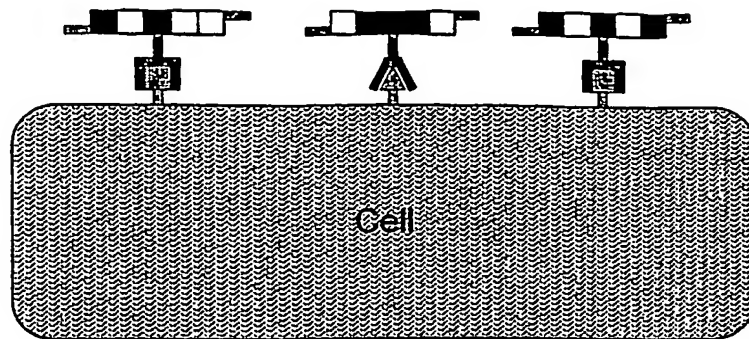

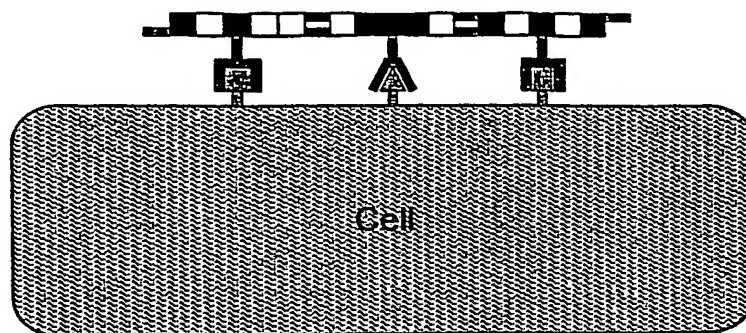

Fig. 3

1) Design Polymers are attached to target molecules:

2) Allow molecular complexes to move in the membrane and ligate adjacent Design Polymers:

3) Attach end adapters with primer template and amplify the linked Design Polymers:
